

15 Case Studies

The International Forum of Sovereign Wealth Funds presents 15 Case Studies on how our members observe the Santiago Principles in practice.

We hope that the publication of case studies will:

- add to the global body of knowledge about - and research into - the investment and operational practices of sovereign funds
- enhance transparency about what sovereign wealth funds are, and what they do
- provide guidance to countries establishing, or considering, a sovereign wealth fund
- provide a useful reference point for peer review among SWFs.

These case studies are provided by the SWFs on a voluntary basis and offer factual insights into how the SWFs have implemented the Santiago Principles.
